MAIL DATE

DELIVERY MODE

12/03/2007

PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 09/869,816	Applicant(s) INOKUCHI ET AL.	
	Examiner Ronald Baum	Art Unit 2136	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 25 September 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-11, 49-63, 87-92 and 94-96 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-11, 49-63, 87-92 and 94-96 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. This action is in reply to applicant's correspondence of 25 September 2007.
2. Claims 1-11, 49-63, 87-92, 94-96 are pending for examination.
3. Claims 1-11, 49-63, 87-92, 94-96 are rejected.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

The previous office action claim 57 rejection under 35 U.S.C. 112, second paragraph, is withdrawn.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-11, 49-63, 87-92, 94-96 are rejected under 35 U.S.C. 102(b) as being anticipated by Daggar, U.S. Patent 5,748,737.

5. As per claim 1; "A data reproducing apparatus comprising:
a storage configured to store
contents data and
corresponding subordinate data,

said contents data including at least

one of

audio data,

video data, and

image data [Abstract, col. 1, lines 5-25, col. 7, lines 33-col. 9, line 31, col. 9, lines 63-col. 21, line 35, whereas the electronic wallet and associated multimedia card and digital card(s) with cryptographic (i.e., encryption/ coding/ decryption/ decoding) based wallet micro-module, secure storage elements, virtual debit card functionality (i.e., the debited amounts per transaction corresponding to subordinate data that modifies the rights (the debit card balance available to transact a transaction); post rights use per transaction), and multiple interface aspects, the wallet/multiple media interfaces card/format/protocol encompassing the functions (i.e., representing audio, visual images, data, etc.) of typical wallet artifacts (i.e., drivers license with associated typical photo image, 'other miscellaneous cards') and allows 'virtually all traditional wallet items to be recreated in the form of electronically stored ...'. Further, '... the user interface means exemplified by a keypad and display, ... elaborate means such as touch based or voice recognition interfaces could ... provided', clearly teach of content embodied as audio/visual/image form(s), encompassing the claimed limitations as broadly interpreted by the examiner.];

Art Unit: 2136

a reproducing unit configured to decode

said contents data *[Abstract, col. 1, lines 5-25, col. 7, lines 33-col. 9, line 31, col. 9, lines 63-col. 21, line 35, whereas the electronic wallet and associated multimedia card and digital card(s) with cryptographic (i.e., encryption/ coding/ decryption/ decoding) based wallet micro-module, secure storage elements, multiple interface aspects (i.e., the cards being medium elements), and 'Other physical information such as a card owner signature, photo, hologram and bar code could also be included on the ... card ... owner specific (i.e., col. 13, lines 28-col. 14, line 8, col. 18, lines 62-col. 21, line 30)']* whereas the case of financial transactions clearly won't occur if said user associated information so embedded is not authenticated (i.e., financial transactions won't allow for multiple, reproduced, duplicated transactions), and therefore encompasses the claimed limitations as broadly interpreted by the examiner.];

a memory configured to store

right data indicating a right to

reproduce said contents data *[Abstract, col. 1, lines 5-25, col. 7, lines 33-col. 9, line 31, col. 9, lines 63-col. 21, line 35, whereas the digital card(s) with cryptographic (i.e., encryption) based wallet micro-module, secure storage elements, virtual debit card functionality, and multiple interface aspects, clearly encompasses the claimed limitations as broadly interpreted by the examiner.];*

and

a controller configured to

control said reproducing unit to reproduce said contents data based on

said right data, and
to change said right data based on
said subordinate data when
said contents data are reproduced [*Abstract, col. 1, lines 5-25, col. 7, lines 33-col. 9, line 31, col. 9, lines 63-col. 21, line 35, whereas the electronic wallet and associated multimedia card and digital card(s) with cryptographic (i.e., encryption) based wallet micro-module, secure storage elements, virtual debit card functionality (i.e., the debited amounts per transaction corresponding to subordinate data that modifies the rights (the debit card balance available to transact a transaction); post rights use per transaction), and multiple interface aspects, clearly encompasses the claimed limitations as broadly interpreted by the examiner.*],
said subordinate data including
a reproduction log identifying reproduced contents [*Abstract, col. 1, lines 5-25, col. 7, lines 33-col. 9, line 31, col. 9, lines 63-col. 21, line 35, and more particularly, col. 9, lines 15-16, whereas the electronic wallet and associated multimedia card and digital card(s) with cryptographic based wallet micro-module, secure storage elements, virtual debit card functionality, such that '... a transaction security controller, and a recorder and reconciler [a reproduction log identifying reproduced contents], among other functions.'*, clearly encompasses the claimed limitations as broadly interpreted by the examiner.].”

Art Unit: 2136

Further, as per claim 11, this claim is the method claim for the apparatus claim 1 above, and is rejected for the same reasons provided for the claim 1 rejection.

6. Claim 2 *additionally recites* the limitation that; “The data reproducing apparatus according to claim 1, wherein

said reproduction log is stored in said memory”.

The teachings of Daggar suggest such limitations (Abstract, col. 1, lines 5-25, col. 7, lines 33-col. 9, line 31, col. 9, lines 63-col. 21, line 35, and more particularly, col. 9, lines 15-16, whereas the electronic wallet and associated multimedia card and digital card(s) with cryptographic based wallet micro-module, secure storage elements, virtual debit card functionality, such that ‘... a transaction security controller, and a recorder and reconciler [reproduction log is stored in said memory], among other functions.’, clearly encompasses the claimed limitations as broadly interpreted by the examiner.).

7. Claim 3 *additionally recites* the limitation that; “The data reproducing apparatus according to claim 1, further comprising

an interface that

safely exchanges data with an external apparatus by

encrypting the data,

wherein

said right data is transmitted through the interface.”.

Art Unit: 2136

The teachings of Daggar suggest such limitations (Abstract, col. 1, lines 5-25, col. 7, lines 33-col. 9, line 31, col. 9, lines 63-col. 21, line 35, whereas the electronic wallet and associated multimedia card and digital card(s) with encryption based wallet micro-module, secure storage elements, and multiple interface aspects, clearly interfaces external to the device (i.e., user interface, magnetic, etc., card interfaces) as associated with the stored data/parameters/transaction (virtual debit card functionality (i.e., the debited amounts per transaction corresponding to subordinate data that modifies the rights (the debit card balance available to transact a transaction); post rights use per transaction)) logs, etc., and encompasses the claimed limitations as broadly interpreted by the examiner.).

8. Claim 4 *additionally recites* the limitation that; “The data reproducing apparatus according to claim 3, wherein

the interface has a contactless communicating unit.”.

The teachings of Daggar suggest such limitations (Abstract, col. 1, lines 5-25, col. 7, lines 33-col. 9, line 31, col. 9, lines 63-col. 21, line 35, whereas the electronic wallet and associated multimedia card and digital card(s), secure storage elements, and multiple interface aspects, clearly interfaces external to the device (i.e., user interface, magnetic, etc., card interfaces) which include proximity/contactless based (i.e., magnetic, weigand, RF, etc.) technologies, and encompasses the claimed limitations as broadly interpreted by the examiner.).

9. Claim 5 *additionally recites* the limitation that; “The data reproducing apparatus according to claim 4, wherein

the interface has
an electric power receiving unit; and
the data stored in said memory can be accessed through said interface by
receiving power through said interface.”.

The teachings of Daggar suggest such limitations (Abstract, col. 1, lines 5-25, col. 7, lines 33-col. 9, line 31, col. 9, lines 63-col. 21, line 35, whereas the electronic wallet and associated multimedia card and digital card(s), secure storage elements, and multiple interface aspects, such that power supplied via solar cells (i.e., col. 12, lines 66-col. 13, line 3, col. 17, lines 1-44), encompasses the claimed limitations as broadly interpreted by the examiner.).

10. Claim 6 *additionally recites* the limitation that; “The data reproducing apparatus according to claim 1, further comprising

an interface that
safely exchanges data with an external apparatus by
encrypting the data,
wherein log data is stored in said memory and
can be transmitted through said interface.”.

The teachings of Daggar suggest such limitations (Abstract, col. 1, lines 5-25, col. 7, lines 33-col. 9, line 31, col. 9, lines 63-col. 21, line 35, whereas the electronic wallet and associated multimedia card and digital card(s) with encryption based wallet micro-module, secure storage elements, and multiple interface aspects, clearly interfaces external to the device (i.e., user interface, magnetic,

Art Unit: 2136

etc., card interfaces) as associated with the stored data/parameters/transaction logs, etc., and encompasses the claimed limitations as broadly interpreted by the examiner.).

11. Claim 7 *additionally recites* the limitation that; “The data reproducing apparatus according to claim 6, wherein

said interface has a contactless communicating unit.”.

The teachings of Daggar suggest such limitations (Abstract, col. 1, lines 5-25, col. 7, lines 33-col. 9, line 31, col. 9, lines 63-col. 21, line 35, whereas the electronic wallet and associated multimedia card and digital card(s), secure storage elements, and multiple interface aspects, clearly interfaces external to the device (i.e., user interface, magnetic, etc., card interfaces) which include proximity/contactless based (i.e., magnetic, weigand, RF, etc.) technologies, and encompasses the claimed limitations as broadly interpreted by the examiner.).

12. Claim 8 *additionally recites* the limitation that; “The data reproducing apparatus according to claim 7, wherein

said interface has an electric power receiving unit and

the data stored in said memory can be accessed through said interface by

receiving power through said interface.”.

The teachings of Daggar suggest such limitations (Abstract, col. 1, lines 5-25, col. 7, lines 33-col. 9, line 31, col. 9, lines 63-col. 21, line 35, whereas the electronic wallet and associated multimedia card and digital card(s), secure storage elements, and multiple interface aspects, such that power

Art Unit: 2136

supplied via solar cells (i.e., col. 12,lines 66-col. 13,line 3, col. 17,lines 1-44), encompasses the claimed limitations as broadly interpreted by the examiner.).

13. Claim 9 *additionally recites* the limitation that; “The data reproducing apparatus according to claim 1, wherein

when the contents data are decoded,

a decoding condition is embedded

as a watermark into the output data.”.

The teachings of Daggar suggest such limitations (Abstract, col. 1,lines 5-25, col. 7,lines 33-col. 9,line 31, col. 9,lines 63-col. 21,line 35, whereas the electronic wallet and associated multimedia card and digital card(s) with encryption based wallet micro-module, secure storage elements, and ‘Other physical information such as a card owner signature, photo, hologram and bar code could also be included on the ... card ... owner specific (i.e., col. 13,lines 28-col. 14,line 8, col. 18,lines 62-col. 21,line 30)’, encompasses the claimed limitations as broadly interpreted by the examiner.).

14. Claim 10 *additionally recites* the limitation that; “The data reproducing apparatus according to claim 9, wherein

when the contents data includes a watermark,

the contents data can be decoded when

the watermark is the same as the decoding condition.”.

Art Unit: 2136

The teachings of Daggar suggest such limitations (Abstract, col. 1, lines 5-25, col. 7, lines 33-col. 9, line 31, col. 9, lines 63-col. 21, line 35, whereas the electronic wallet and associated multimedia card and digital card(s) with encryption based wallet micro-module, secure storage elements, and 'Other physical information such as a card owner signature, photo, hologram and bar code could also be included on the ... card ... owner specific (i.e., col. 13, lines 28-col. 14, line 8, col. 18, lines 62-col. 21, line 30)' whereas the case of financial transactions clearly won't occur if said user associated information so embedded is not authenticated (i.e., financial transactions won't allow for multiple, reproduced, duplicated transactions), and therefore encompasses the claimed limitations as broadly interpreted by the examiner.).

15. As per claim 49; "A data reproducing apparatus comprising:

a first storage configured to store

contents data and

corresponding subordinate data,

said contents data including at least

one of

audio data,

video data, and

image data, and

said subordinate data including at least

a reproducing condition of said contents data [*Abstract, col. 1, lines*

5-25, col. 7, lines 33-col. 9, line 31, col. 9, lines 63-col. 21, line 35, whereas

Art Unit: 2136

the electronic wallet and associated multimedia card and digital card(s) with cryptographic (i.e., encryption/ coding/ decryption/ decoding) based wallet micro-module, secure storage elements, virtual debit card functionality (i.e., the debited amounts per transaction corresponding to subordinate data that modifies the rights (the debit card balance available to transact a transaction); post rights use per transaction, inclusive of decoding/decryption of debit/content data for said transaction use), and multiple interface aspects, the wallet/multiple media interfaces card/format/protocol encompassing the functions (i.e., representing audio, visual images, data, etc.,) of typical wallet artifacts (i.e., drivers license with associated typical photo image, 'other miscellaneous cards') and allows 'virtually all traditional wallet items to be recreated in the form of electronically stored ...'. Further, '... the user interface means exemplified by a keypad and display, ... elaborate means such as touch based or voice recognition interfaces could ... provided', clearly teach of content embodied as audio/visual/image form(s), clearly encompasses the claimed limitations as broadly interpreted by the examiner.];

a reproducing unit configured to decode

said contents data and

subordinate data; and [Abstract, col. 1, lines 5-25, col. 7, lines 33-col. 9, line 31, col. 9, lines 63-col. 21, line 35, whereas the electronic wallet and associated multimedia card and digital card(s) with cryptographic (i.e., encryption/ coding/ decryption/

Art Unit: 2136

decoding) based wallet micro-module, secure storage elements, multiple interface aspects (i.e., the cards being medium elements), and 'Other physical information such as a card owner signature, photo, hologram and bar code could also be included on the ... card ... owner specific (i.e., col. 13, lines 28-col. 14, line 8, col. 18, lines 62-col. 21, line 30)' whereas the case of financial transactions clearly won't occur if said user associated information so embedded is not authenticated (i.e., financial transactions won't allow for multiple, reproduced, duplicated transactions), and therefore encompasses the claimed limitations as broadly interpreted by the examiner.];

a second storage configured to store right data; and [Abstract, col. 1, lines 5-25, col. 7, lines 33-col. 9, line 31, col. 9, lines 63-col. 21, line 35, whereas the electronic wallet micro-module secure storage and multiple interface aspects, clearly encompasses the claimed limitations as broadly interpreted by the examiner.]; and

a controller configured to control changing

said right data stored in said second storage

corresponding to said subordinate data when

contents data reproduced by said reproducing unit is

not free [Abstract, col. 1, lines 5-25, col. 7, lines 33-col. 9, line 31, col. 9, lines 63-col. 21, line 35, whereas the electronic wallet micro-module secure storage (i.e., col. 18, lines 62-col. 21, line 35, col. 9, lines 5-30 'emphasis on data security as opposed to media security ... a remote banking terminal, ... a transaction security controller, and transaction recorder and reconciler, among other functions ...'), virtual debit card

functionality (i.e., the debited amounts per transaction corresponding to subordinate data that modifies the rights (the debit card balance available to transact a transaction; inclusive of rights such that debit amounts are unlimited (i.e., content is effectively 'free') /balance of 'zero' (i.e., content is effectively completely restricted from a rights aspect) states); post rights use per transaction, inclusive of decoding/decryption of debit/content data for said transaction use), clearly encompasses the claimed limitations as broadly interpreted by the examiner.],

said subordinate data including

a reproduction log identifying reproduced contents [Abstract, col. 1, lines 5-25, col. 7, lines 33-col. 9, line 31, col. 9, lines 63-col. 21, line 35, and more particularly, col. 9, lines 15-16, whereas the electronic wallet and associated multimedia card and digital card(s) with cryptographic based wallet micro-module, secure storage elements, virtual debit card functionality, such that '... a transaction security controller, and a recorder and reconciler [a reproduction log identifying reproduced contents], among other functions.', clearly encompasses the claimed limitations as broadly interpreted by the examiner.]".

16. Claim 50 ***additionally recites*** the limitation that; "The reproducing apparatus according to claim 49, wherein

when the decoded contents data is free,

the controller does not change

said right data stored in said second storage.”.

The teachings of Daggar suggest such limitations (Abstract, col. 1, lines 5-25, col. 7, lines 33-col. 9, line 31, col. 9, lines 63-col. 21, line 35, whereas the electronic wallet micro-module secure storage (i.e., col. 18, lines 62-col. 21, line 35, col. 9, lines 5-30 ‘emphasis on data security as opposed to media security ... a remote banking terminal, ... a transaction security controller, and transaction recorder and reconciler, among other functions ...’), virtual debit card functionality (i.e., the debited amounts per transaction corresponding to subordinate data that modifies the rights (the debit card balance available to transact a transaction; inclusive of rights such that debit amounts are unlimited (i.e., content is effectively ‘free’ and rights data also effectively does not change) /balance of ‘zero’ (i.e., content is effectively completely restricted from a rights aspect) states); post rights use per transaction, inclusive of decoding/decryption of debit/content data for said transaction use), clearly encompasses the claimed limitations as broadly interpreted by the examiner.).

17. Claim 51 *additionally recites* the limitation that; “The reproducing apparatus according to claim 49, further comprising

a converting unit configured to convert

output contents data outputted from the reproducing unit into

an analog signal.”.

The teachings of Daggar suggest such limitations (Abstract, col. 1, lines 5-25, col. 7, lines 33-col. 9, line 31, col. 9, lines 63-col. 21, line 35, whereas the electronic wallet and associated multimedia card and digital card(s), secure storage elements, and multiple interface aspects, clearly

Art Unit: 2136

interfaces external to the device (i.e., user interface, magnetic, etc., card interfaces) which include proximity/contactless based (i.e., magnetic, weigand, RF, etc.) technologies, whereas the interfacing to said technologies is an analog signal, and encompasses the claimed limitations as broadly interpreted by the examiner.).

18. Claim 52 *additionally recites* the limitation that; “The reproducing apparatus according to claim 49, wherein

said reproduction log is stored in

said second storage.”.

The teachings of Daggar suggest such limitations (Abstract, col. 1, lines 5-25, col. 7, lines 33-col. 9, line 31, col. 9, lines 63-col. 21, line 35, whereas the electronic wallet and associated multimedia card and digital card(s) with encryption based wallet micro-module, secure storage elements, and the case of financial transactions (i.e., banking transactions) and user associated information, encompasses the claimed limitations as broadly interpreted by the examiner.).

19. Claim 53 *additionally recites* the limitation that; “The reproducing apparatus according to claim 52, further comprising

a communicating unit, wherein

the reproduction log and

the right data are transmitted to

an external apparatus through the communicating unit.”.

Art Unit: 2136

The teachings of Daggar suggest such limitations (Abstract, col. 1, lines 5-25, col. 7, lines 33-col. 9, line 31, col. 9, lines 63-col. 21, line 35, whereas the electronic wallet case of financial transactions (i.e., banking transactions) and user associated information, encompasses the claimed limitations as broadly interpreted by the examiner.).

20. Claim 54 *additionally recites* the limitation that; “The reproducing apparatus according to claim 53, wherein

an operation power is supplied to the apparatus from

an exterior source through the communicating unit.”.

The teachings of Daggar suggest such limitations (Abstract, col. 1, lines 5-25, col. 7, lines 33-col. 9, line 31, col. 9, lines 63-col. 21, line 35, whereas the electronic wallet and associated multimedia card and digital card(s), secure storage elements, and multiple interface aspects, such that power supplied via solar cells (i.e., col. 12, lines 66-col. 13, line 3, col. 17, lines 1-44), encompasses the claimed limitations as broadly interpreted by the examiner.).

21. Claim 55 *additionally recites* the limitation that; “The reproducing apparatus according to claim 49, wherein the reproducing unit comprises

a decoder configured to decode

an encryption performed on the contents data and

a decompressing unit configured to decompress

the data decoded by the decoder.”.

Art Unit: 2136

The teachings of Daggar suggest such limitations (Abstract, col. 1, lines 5-25, col. 7, lines 33-col. 9, line 31, col. 9, lines 63-col. 21, line 35, whereas the electronic wallet and associated multimedia card and digital card(s) with cryptographic (i.e., encryption/ coding/ decryption/ decoding) and associated data protocol processing (i.e., decompressing, decoding, reformatting, etc.,) based wallet micro-module, secure storage elements, multiple interface aspects (i.e., the cards being medium elements), and 'Other physical information such as a card owner signature, photo, hologram and bar code could also be included on the ... card ... owner specific (i.e., col. 13, lines 28-col. 14, line 8, col. 18, lines 62-col. 21, line 30)' whereas the case of financial transactions clearly won't occur if said user associated information so embedded is not authenticated (i.e., financial transactions won't allow for multiple, reproduced, duplicated transactions), and therefore encompasses the claimed limitations as broadly interpreted by the examiner.).

22. Claim 56 *additionally recites* the limitation that; "The reproducing apparatus according to claim 49, further comprising

a watermark detecting unit for

detecting whether a watermark has been added to output data outputted from the reproducing unit,

wherein when the watermark is not detected from

the reproduced data, the reproduced data are outputted."

The teachings of Daggar suggest such limitations (Abstract, col. 1, lines 5-25, col. 7, lines 33-col. 9, line 31, col. 9, lines 63-col. 21, line 35, whereas the electronic wallet and associated multimedia

card and digital card(s) with encryption based wallet micro-module, secure storage elements, and 'Other physical information such as a card owner signature, photo, hologram and bar code could also be included on the ... card ... owner specific (i.e., col. 13,lines 28-col. 14,line 8, col. 18,lines 62-col. 21,line 30)', encompasses the claimed limitations as broadly interpreted by the examiner.).

23. Claim 57 *additionally recites* the limitation that; "The reproducing apparatus according to claim 56, wherein

when the data regarding the reproducing conditions are

included in the watermark detected by the watermark detecting unit,

the controller

collates the output data with the data regarding the reproducing

conditions extracted from the reproduced subordinate data and

outputs the reproducing data from the reproducing unit when

the data corresponding to the reproducing conditions

detected by the watermark detecting unit coincides with

the data corresponding to the reproducing conditions

extracted from the reproduced subordinate data stored in the first storage.".

The teachings of Daggar suggest such limitations (Abstract, col. 1,lines 5-25, col. 7,lines 33-col. 9,line 31, col. 9,lines 63-col. 21,line 35, whereas the electronic wallet and associated multimedia card and digital card(s) with encryption based wallet micro-module, secure storage elements, and

‘Other physical information such as a card owner signature, photo, hologram and bar code could also be included on the ... card ... owner specific (i.e., col. 13,lines 28-col. 14,line 8, col. 18,lines 62-col. 21,line 30)’ whereas the case of financial transactions clearly won’t occur if said user associated information so embedded is not authenticated (i.e., financial transactions won’t allow for multiple, reproduced, duplicated transactions), and therefore encompasses the claimed limitations as broadly interpreted by the examiner.).

24. Claim 58 *additionally recites* the limitation that; “The reproducing apparatus according to claim 56, wherein

when the data regarding the reproducing conditions detected by the watermark detecting unit does not coincide with

the data regarding the reproducing conditions extracted from the decoded subordinate data stored in the first storage,

the controller does not output the reproduced contents data from the decoding unit.”.

The teachings of Daggar suggest such limitations (Abstract, col. 1,lines 5-25, col. 7,lines 33-col. 9,line 31, col. 9,lines 63-col. 21,line 35, whereas the electronic wallet and associated multimedia card and digital card(s) with encryption based wallet micro-module, secure storage elements, and ‘Other physical information such as a card owner signature, photo, hologram and bar code could also be included on the ... card ... owner specific (i.e., col. 13,lines 28-col. 14,line 8, col. 18,lines 62-col. 21,line 30)’ whereas the case of financial transactions clearly won’t occur if said user associated information so embedded is not authenticated (i.e., financial transactions won’t

Art Unit: 2136

allow for multiple, reproduced, duplicated transactions), and therefore encompasses the claimed limitations as broadly interpreted by the examiner.).

25. Claim 59 *additionally recites* the limitation that; “The reproducing apparatus according to claim 58, wherein

said reproducing unit further includes

a reproducing conditions detecting unit configured to

extract the data regarding the reproducing conditions from the decoded contents data.”.

The teachings of Daggar suggest such limitations (Abstract, col. 1, lines 5-25, col. 7, lines 33-col. 9, line 31, col. 9, lines 63-col. 21, line 35, whereas the electronic wallet and associated multimedia card and digital card(s) with encryption based wallet micro-module, secure storage elements, and ‘Other physical information such as a card owner signature, photo, hologram and bar code could also be included on the ... card ... owner specific (i.e., col. 13, lines 28-col. 14, line 8, col. 18, lines 62-col. 21, line 30)’ whereas the case of financial transactions clearly won’t occur if said user associated information so embedded is not authenticated (i.e., financial transactions won’t allow for multiple, reproduced, duplicated transactions), and therefore encompasses the claimed limitations as broadly interpreted by the examiner.).

26. Claim 60 *additionally recites* the limitation that; “The reproducing apparatus according to claim 57, further comprising

a watermark adding unit configured to

Art Unit: 2136

add a watermark formed on the basis of
the data regarding the reproducing conditions,
wherein when the watermark cannot correctly be detected from the decoded contents data
outputted from said reproducing unit by the watermark detecting unit,
the watermark adding unit
forms the watermark and
adds the watermark to the reproduced contents data.”.

The teachings of Daggar suggest such limitations (Abstract, col. 1, lines 5-25, col. 7, lines 33-col. 9, line 31, col. 9, lines 63-col. 21, line 35, whereas the electronic wallet and associated multimedia card and digital card(s) with encryption based wallet micro-module, secure storage elements, and ‘Other physical information such as a card owner signature, photo, hologram and bar code could also be included on the ... card ... owner specific (i.e., col. 13, lines 28-col. 14, line 8, col. 18, lines 62-col. 21, line 30)’ whereas the case of financial transactions clearly won’t occur if said user associated information so embedded is not authenticated (i.e., financial transactions won’t allow for multiple, reproduced, duplicated transactions), and therefore encompasses the claimed limitations as broadly interpreted by the examiner.).

27. Claim 61 *additionally recites* the limitation that; “The reproducing apparatus according to claim 60, wherein

when the watermark is correctly detected from the reproduced contents data from the reproducing unit by said watermark detecting unit,
said watermark adding unit

does not add the watermark to the reproduced contents data.”.

The teachings of Daggar suggest such limitations (Abstract, col. 1, lines 5-25, col. 7, lines 33-col. 9, line 31, col. 9, lines 63-col. 21, line 35, whereas the electronic wallet and associated multimedia card and digital card(s) with encryption based wallet micro-module, secure storage elements, and ‘Other physical information such as a card owner signature, photo, hologram and bar code could also be included on the ... card ... owner specific (i.e., col. 13, lines 28-col. 14, line 8, col. 18, lines 62-col. 21, line 30)’ whereas the case of financial transactions clearly won’t occur if said user associated information so embedded is not authenticated (i.e., financial transactions won’t allow for multiple, reproduced, duplicated transactions), and therefore encompasses the claimed limitations as broadly interpreted by the examiner.).

28. Claim 62 *additionally recites* the limitation that; “The reproducing apparatus according to claim 49, wherein

said reproducing unit,

said second storage, and

said controller are constructed as one chip.”.

The teachings of Daggar suggest such limitations (Abstract, col. 1, lines 5-25, col. 7, lines 33-col. 9, line 31, col. 9, lines 63-col. 21, line 35, whereas the electronic wallet and associated multimedia card and digital card(s) with encryption based wallet micro-module, secure storage elements, are such that the various embodiments involving the wallet/smartcard architectures clearly are integrated into single chip configurations, and therefore encompasses the claimed limitations as broadly interpreted by the examiner.).

Art Unit: 2136

29. Claim 63 *additionally recites* the limitation that; “The reproducing apparatus according to claim 49, wherein

when the right data stored said second storage unit indicate that

the reproduced contents data cannot be reproduced,

said controller stops the reproducing process.”.

The teachings of Daggar suggest such limitations (Abstract, col. 1, lines 5-25, col. 7, lines 33-col. 9, line 31, col. 9, lines 63-col. 21, line 35, whereas the electronic wallet and associated multimedia card and digital card(s) with encryption based wallet micro-module, secure storage elements, and ‘Other physical information such as a card owner signature, photo, hologram and bar code could also be included on the ... card ... owner specific (i.e., col. 13, lines 28-col. 14, line 8, col. 18, lines 62-col. 21, line 30)’ whereas the case of financial transactions clearly won’t occur if said user associated information so embedded is not authenticated (i.e., financial transactions won’t allow for multiple, reproduced, duplicated transactions), and therefore encompasses the claimed limitations as broadly interpreted by the examiner.).

30. Claim 87 *additionally recites* the limitation that; “The data reproducing apparatus according to claim 1, wherein

said contents data includes at least one of

audio data,

video data,

still image data,

character data,
computer graphic data,
game software, and
a computer program.”.

The teachings of Daggar suggest such limitations (Abstract, col. 1, lines 5-25, col. 7, lines 33-col. 9, line 31, col. 9, lines 63-col. 21, line 35, whereas the electronic wallet and associated multimedia card and digital card(s) with encryption based wallet micro-module, secure storage elements, and ‘Other physical information such as a card owner signature, photo, hologram and bar code could also be included on the ... card ... owner specific (i.e., col. 13, lines 28-col. 14, line 8, col. 18, lines 62-col. 21, line 30)’ whereas the case of ‘... card owner signature, photo, hologram ...’, clearly encompasses the claimed limitations as broadly interpreted by the examiner.).

31. Claim 88 *additionally recites* the limitation that; “The data reproducing apparatus according to claim 49, wherein

said contents data includes at least one of

audio data,
video data,
still image data,
character data,
computer graphic data,
game software, and
a computer program.”.

The teachings of Daggar suggest such limitations (Abstract, col. 1, lines 5-25, col. 7, lines 33-col. 9, line 31, col. 9, lines 63-col. 21, line 35, whereas the electronic wallet and associated multimedia card and digital card(s) with encryption based wallet micro-module, secure storage elements, and 'Other physical information such as a card owner signature, photo, hologram and bar code could also be included on the ... card ... owner specific (i.e., col. 13, lines 28-col. 14, line 8, col. 18, lines 62-col. 21, line 30)' whereas the case of '... card owner signature, photo, hologram ...', clearly encompasses the claimed limitations as broadly interpreted by the examiner.).

32. Claim 89 *additionally recites* the limitation that; "The data reproducing method according to claim 11, further comprising the step of
- exchanging data with an external apparatus through an interface
- by encrypting the data,
- wherein said right data is transmitted through the interface."

The teachings of Daggar suggest such limitations (Abstract, col. 1, lines 5-25, col. 7, lines 33-col. 9, line 31, col. 9, lines 63-col. 21, line 35, whereas the electronic wallet and associated multimedia card and digital card(s) with encryption based wallet micro-module, secure storage elements, and multiple interface aspects, clearly interfaces external to the device (i.e., user interface, magnetic, etc., card interfaces) as associated with the stored data/parameters/transaction logs, etc., and encompasses the claimed limitations as broadly interpreted by the examiner.).

33. Claim 90 *additionally recites* the limitation that; "The data reproducing method according to claim 89, wherein the step of exchanging data comprises the step of

exchanging data through an interface

that includes a contactless communicating unit.”.

The teachings of Daggar suggest such limitations (Abstract, col. 1, lines 5-25, col. 7, lines 33-col. 9, line 31, col. 9, lines 63-col. 21, line 35, whereas the electronic wallet and associated multimedia card and digital card(s), secure storage elements, and multiple interface aspects, clearly interfaces external to the device (i.e., user interface, magnetic, etc., card interfaces) which include proximity/contactless based (i.e., magnetic, weigand, RF, etc.) technologies, and encompasses the claimed limitations as broadly interpreted by the examiner.).

34. Claim 91 *additionally recites* the limitation that; “The data reproducing method according to claim 90, wherein the step of exchanging data comprises the step of
exchanging data through an interface
that includes an electric power receiving unit; and
wherein data can be accessed through said interface by
receiving power through said interface.”.

The teachings of Daggar suggest such limitations (Abstract, col. 1, lines 5-25, col. 7, lines 33-col. 9, line 31, col. 9, lines 63-col. 21, line 35, whereas the electronic wallet and associated multimedia card and digital card(s), secure storage elements, and multiple interface aspects, such that power supplied via solar cells (i.e., col. 12, lines 66-col. 13, line 3, col. 17, lines 1-44), encompasses the claimed limitations as broadly interpreted by the examiner.).

35. Claim 92 *additionally recites* the limitation that; “The data reproducing method according to claim 11, further comprising the step of
transmitting said reproduction log through an interface.”.

The teachings of Daggar suggest such limitations (Abstract, col. 1, lines 5-25, col. 7, lines 33-col. 9, line 31, col. 9, lines 63-col. 21, line 35, whereas the electronic wallet case of financial transactions (i.e., banking transactions) and user associated information, encompasses the claimed limitations as broadly interpreted by the examiner.).

36. Claim 94 *additionally recites* the limitation that; “The data reproducing method according to claim 92, wherein the step of exchanging data comprises the step of
exchanging data through an interface
that includes a contactless communicating unit.”.

The teachings of Daggar suggest such limitations (Abstract, col. 1, lines 5-25, col. 7, lines 33-col. 9, line 31, col. 9, lines 63-col. 21, line 35, whereas the electronic wallet and associated multimedia card and digital card(s) with encryption based wallet micro-module, secure storage elements, and multiple interface aspects, clearly interfaces external to the device (i.e., user interface, magnetic, etc., card interfaces) as associated with the stored data/parameters/transaction logs, etc., and encompasses the claimed limitations as broadly interpreted by the examiner.).

37. Claim 95 *additionally recites* the limitation that; “The data reproducing method according to claim 94, wherein the step of exchanging data comprises the step of
exchanging data through an interface

that includes an electric power receiving unit; and
wherein data can be accessed through said interface by
receiving power through said interface.”.

The teachings of Daggar suggest such limitations (Abstract, col. 1, lines 5-25, col. 7, lines 33-col. 9, line 31, col. 9, lines 63-col. 21, line 35, whereas the electronic wallet and associated multimedia card and digital card(s), secure storage elements, and multiple interface aspects, such that power supplied via solar cells (i.e., col. 12, lines 66-col. 13, line 3, col. 17, lines 1-44), encompasses the claimed limitations as broadly interpreted by the examiner.).

38. Claim 96 *additionally recites* the limitation that; “The data reproducing method according to claim 11, wherein

said step of reproducing comprises the steps of
decoding said contents data and
embedding a decoding condition
as a watermark on the decoded data.”.

The teachings of Daggar suggest such limitations (Abstract, col. 1, lines 5-25, col. 7, lines 33-col. 9, line 31, col. 9, lines 63-col. 21, line 35, whereas the electronic wallet and associated multimedia card and digital card(s) with encryption based wallet micro-module, secure storage elements, and ‘Other physical information such as a card owner signature, photo, hologram and bar code could also be included on the ... card ... owner specific (i.e., col. 13, lines 28-col. 14, line 8, col. 18, lines 62-col. 21, line 30)’, encompasses the claimed limitations as broadly interpreted by the examiner.).

Response to Amendment

39. As per applicant's argument concerning the lack of teaching by Daggar of "contents data including at least one of audio data, video data, and image data", the examiner has fully considered in this response to amendment; the arguments, and finds them not to be persuasive (see claims 1, 11 and 49 rejections above), insofar as Daggar clearly teaches of the wallet/multiple media interfaces card/format/protocol encompassing the functions (i.e., representing audio, visual images, data, etc.) of typical wallet artifacts (i.e., drivers license with associated typical photo image, 'other miscellaneous cards') and allows 'virtually all traditional wallet items to be recreated in the form of electronically stored ...'. Further, '... the user interface means exemplified by a keypad and display, ... elaborate means such as touch based or voice recognition interfaces could ... provided', clearly teach of content embodied as audio/visual/image form(s). The ***amended claim language*** still does not patently distinguish the claimed invention from the claims as previously presented, such that the rejections as presented above in the claim-by-claim rejection are maintained.

Conclusion

40. Any inquiry concerning this communication or earlier communications from examiner should be directed to Ronald Baum, whose telephone number is (571) 272-3861, and whose unofficial Fax number is (571) 273-3861 and unofficial email is Ronald.baum@uspto.gov. The examiner can normally be reached Monday through Thursday from 8:00 AM to 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nasser Moazzami, can be reached at (571) 272-4195. The Fax number for the organization where this application is assigned is **571-273-8300**.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. For more information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
